SpadWatch: Privacy statement

Infrabel is the owner of the application SpadWatch. SpadWatch is meant to protect drivers from passing signals at danger.

During the usage of the SpadWatch three types of data are collected:

1) **Location data**: in order for the application to function properly, the location is continuously collected and sent to a database. This data is distributed in real time to a sister application. This sister application will not record any data but present the real time situation to the user. Only employees of Infrabel or TucRail with the appropriate clearance will be able to access this sister application.

2) **User actions**: all actions made by the user in the app are recorded and sent to a database. This data is only used in case of application malfunctioning.

3) **Device related data**: the IMEI, IMSI and Android ID are collected as part of the logging process to identify a single user.

Under no conditions will this data be sent to third parties or used in any other way than is described above. Users have the right to request to see the data, rectify data and erase the data. In order to block any data gathering, the user will have to uninstall the application as the application cannot function without this data gathering.

Any change in this privacy statement will be associated with an update of the application that requires user approval.

This privacy policy is effective as of 01/01/2018.
